

Breast Health Access for Women with Disabilities (BHAWD)

Providing Quality Accessible Services To Women With Disabilities and Seniors At Your Facility

“Increasing Access to Mammography Services for Women with Disabilities” *Training for Mammography Technologists*

Overall Training Goal

BHAWD conducts five-hour trainings for Mammography Technologists and staff on ways to increase awareness and expand mammography access for women with disabilities and seniors.

Specific Training Objectives

- 1 - Identify barriers and solutions in providing mammography screening. Acquire tools and resources to implement in your facility;
- 2 - Recognize the special needs and concerns of women with disabilities, for example, those of women with developmental and cognitive limitations;
- 3 - Learn effective communication skills;
- 4 - Advance skills for modifying mammography positioning techniques;
- 5 - Explore strategies for setting boundaries in challenging mammography situations.

This activity has been approved by the ASRT for 5
Category A Credits.
